Nohana-shoubu: Japanese wild iris (*Iris ensata* var. *spontanea* Nakai)

Hana-shoubu was created by Nohana-shoubu. The floral shape and color of Nohana-shoubu will be mutations with a slight probability every time by breeding. In other words, you can create your own original flowers. In the Edo period, Nohana-shoubu changed a various Hana-shoubu in a short time, and it given interesting names by Edo people. It takes a long time from seeding to flowering. If you create the original flower blooms, what would you name?
