

# Phantom butterfly

Akihiro Yoneyama

**Hi! I'm Aki. I have something to show you. Guess what??? I found a funny "butterfly"!!!! What was that?? "This is a flower" Hahaha! Will you turn this picture upside down?? It looks like "butterfly", right? I found this butterfly at Tamagawa University on June 8. This butterfly's name was Arutai. So cute!!!! Arutai seemed Japanese animation character's name!!! The deep purple wings(outer perianth) of Arutai grabbed my attention. The wings had many tiny stars. I couldn't believe my eyes!!! Arutai had one yellow point(eye signal) on each wings. The contrast between purple and yellow was very beautiful, so Arutai stood out. In fact, Arutai had arms. Arutai concealed yellow points with arms(inner perianth) because Arutai was shy. Arutai's face was slender like the horse.**

**????????? Do you have something to say?? "I want to see the butterfly."  
You will see Arutai next year. But, be careful. Arutai will fly just one day.**
