

Time capsule

Iris ensata spontanea cv. Satsukibare

Name; Ryuji Hayashi.
Graduate School of Agriculture,
1st grade of Master Course

I'm going to write like a novel. This text doesn't explain *Iris ensata spontanea* cv. Satsukibare, because I want to write freedom. **Sorry brother !**

I have something to think about it recently. 'Who am I?'

I don't know What makes me happy and What makes me painful. Perhaps Their emotions are forever universal. I am going to lie down on the bed for thinking those things and remember the past. I sometimes fall asleep.lol

I went off the topic. The *Iris ensata spontanea* I chose is 'Satsukibare'.The reason is simple.

Because I met her and remembered my past. They are the fun memory,the happy memory and tough memory.

I have never experienced to remind my past memory by encountering plant. If there is any, It will be to run into close persons.

She (Satsukibare) remind me of memory and teach me to walk my future life.

This is just like a time capsule with the letter addressed to ten years from now when I was in elementary school.

By the way, I can't see the end of noted above. So, I am going to enter the conclusion.

What I want to tell is if you got lost in your life, you should stop and appreciate the flowers. Then, You can be able to get chance for reminding yourself forgotten memory.

Your forgotten memory may solve your worries.

That's exactly why I appreciate the beautiful flowers until the end of my life. Good bye!
