

# *Umibotaru*

My favorite iris is “Umibotaru”.  
When I first saw this flower, I was fascinated by the beauty of the perianth.  
At the same time, the yellow part of the eye makes me feel like a firefly flying in the night sky.  
Exactly this iris suits the name “Umibotaru”.

How about spending this summer with beautiful irises called “Umibotaru”?  
It will surely be a wonderful memory for you. . .
