master's course

Blue sky, blue sea, blue bird ...I love blue colors. There are not many blue flowers in nature. Asagisuisyou is one of the precious blue flowers. This flower has a very simple morphology with three outer perianth and white style arm, and you can clearly see the delicacy of the Hana-shoubu. But you have to be careful when you see the Asagisuisyou. The outer perianth has exquisite wrinkles, and the inner perianth is red in the periphery, Which accents the tint of the flowers. If you are relaxed, you will be captivated by the fascination of this flower.
